

### "BREAKING-IN" THE 8-98 AND 8-98A MODELS

This car has been thoroughly checked and adjusted, and is in good running order as it leaves the factory.

It should be carefully handled during the "wearing-in" period.

Care in operation until all parts are thoroughly adjusted and worn to a proper fit, will result in much longer life to the car, and more satisfactory performance.

Handle the car carefully in the first 100 miles of driving and do not speed it to exceed 21 miles per hour during this period.

### LICENSE DATA

Number of Cylinders	8
Cylinder Bore	5"
Stroke	4 $\frac{1}{4}$ "
