AUBURN, INDIANA

EXECUTIVE OFFICE

CABLE ADDRESS—ACDCO

October 9, 1948

Mr. Robert H. Clift
Box 5345, V.P.I., Tech. Station
Blacksburg, Virginia

Dear Mr. Clift:

We wish to thank you for your inquiry of recent date requesting details of our motor exchange plan.

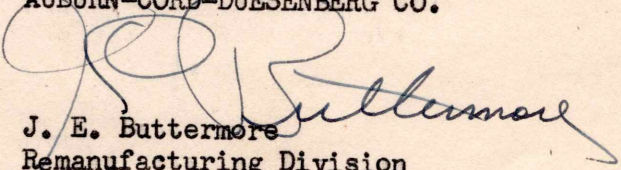

You can acquire a factory precision rebuilt motor for your Model FC812 Supercharger Cord at a cost of \$350.00 on an exchange basis. This motor is complete with the exception of the cylinder heads, fuel pump, water pump, manifolds, supercharger, flywheel, carburetor and electrical equipment. Such equipment seldom requires replacing and can easily be removed from your old motor and attached to the renewed one at the time of making the change.

Automobile engines, like other types of power units in machinery, require extensive repairs and service which, over a period of time, involve a considerable amount of expense. Realize the most from your investment in your Cord car by securing one of these special low priced motors. Get the thrill of driving with that new car feeling.

Arrangements will be made to deliver one of the rebuilt motors to you in accordance with your wishes if you will send your order with the customary deposit of \$100.00 to the attention of the writer. This deposit will be refunded upon receipt of your old motor, freight charges prepaid.

Yours very truly,

AUBURN-CORD-DUESENBERG CO.
